

Re-design for Cisco client.

Challenge: Client thought her site was boring and wanted a suggestion about how to make it “pop”.

See below for my solution of the before-and after in regards to upgrading a very old interface with the UI3.2.

This is the AFTER shot: I added a new photo to the top of the page, as well as upgrading the template, and also added a tabs component to organize content. Also included a “click to enlarge” component for a slide they wanted to showcase in one of the tabs.

**Objective**  
The Director Nomination Process is a strategic lever for growing our executive pipeline. Each new position created and each leader promoted represents an opportunity to make a positive investment in Cisco's business transformation.
